Job Opportunities in Pharma Sector in Present Scenario

S. No	Component/Activities	Details of event
1	Name of the Department / Unit / Agency:	Pharmaceutical Chemistry
2	Name of the Activity:	Online Webinar on "Job Opportunities in Pharma Sector in Present Scenario"
3	Date and Year of the Activity:	16-08-2021
4	Number of Students Participated in the activity:	125
5	Report of the Activity (in 100 words):	<p>Department of Pharmaceutical Chemistry has organized Webinar on " Job Opportunities in Pharma Sector in Present Scenario" on dated 16 August 2021 on zoom Platform. The speaker was Dr. Ritesh Mishra Department of Analytical Development Medilux, Laboratories, Pithampur. In presence of Chief Patron Dr. Suresh T. Silawat Principal and Additional Director of Higher Education Indore Division. Conviner of this webinar was Dr. M.K.Dwivedi Prof. and Head department of Pharma Chemistry. Organizing Committee includes Dr. Rashmi Agarwal Prof. Rashmi Joshi, Prof. Hema Kochar, Prof. Anjali Yadav, Prof. Richa Sharma.</p> <p>It was very usefull for all the participants for selcting their career in pharma sector in pandamic period of Covid-19</p>

****Department of Statistics Career Counselling Programme Report****

****Date: 26/3/2021****

****Introduction:****

On 26th March 2021, the Department of Statistics organized a Career Counselling Programme focusing on the fascinating field of Environmental Statistics. The event aimed to provide students and faculty members with valuable insights into the applications of statistics in environmental research and the potential career opportunities in this field. The lecture was delivered by Dr. Rajesh Tailor, an esteemed expert in environmental statistics.

****Programme Overview:****

The Career Counselling Programme aimed to address the increasing interest among students in pursuing careers in environmental statistics, which involves the application of statistical methods to analyze and interpret environmental data. The event welcomed undergraduate and postgraduate students, as well as faculty members interested in exploring the field of environmental statistics.

****Guest Lecture by Dr. Rajesh Tailor:****

Dr. Rajesh Tailor, a renowned statistician specializing in environmental research, delivered an engaging and informative lecture on the subject of Environmental Statistics. His expertise and experience in the field allowed him to provide participants with a comprehensive understanding of the applications of statistics in environmental studies. The lecture covered the following key elements:

****1. Introduction to Environmental Statistics:****

Dr. Tailor began by providing an introduction to environmental statistics, highlighting its significance in addressing environmental challenges and making informed decisions regarding natural resources and environmental management. He explained how statistical methods are used to analyze and interpret data related to air quality, water resources, climate change, and biodiversity.

****2. Statistical Techniques in Environmental Studies:****

The guest lecture focused on showcasing the various statistical techniques used in environmental studies. Dr. Tailor discussed methods such as regression analysis, time series

analysis, spatial statistics, and sampling techniques. He explained how these techniques are applied to analyze environmental data, model environmental processes, and assess the impact of human activities on the environment.

****3. Environmental Data Collection and Analysis:****

Dr. Tailor delved into the process of environmental data collection and analysis. He emphasized the importance of collecting accurate and representative data from various environmental sources, such as weather stations, remote sensing satellites, and environmental monitoring networks. He discussed the statistical methods employed to analyze these data sets and draw meaningful conclusions.

****4. Applications of Environmental Statistics:****

The guest lecture highlighted the diverse applications of environmental statistics. Dr. Tailor discussed how statistical analysis is used in environmental impact assessments, environmental risk assessments, ecological modeling, and natural resource management. He provided examples of real-world environmental studies where statistical methods played a crucial role in understanding environmental processes and formulating effective strategies.

****5. Career Opportunities in Environmental Statistics:****

The lecture concluded with a discussion on the career opportunities available in the field of environmental statistics. Dr. Tailor highlighted potential roles such as environmental statistician, data analyst, environmental consultant, and research scientist. He discussed the demand for professionals with expertise in environmental statistics and the skills and knowledge required to excel in this field.

****Conclusion:****

The Career Counselling Programme organized by the Department of Statistics on 26th March 2021 was a great success. The department extends its gratitude to Dr. Rajesh Tailor for sharing his expertise and inspiring the participants to pursue careers in environmental statistics, contributing to the advancement of environmental science and sustainability.

****Department of Statistics Career Counselling Programme Report****

****Date: 25/2/2022****

****Introduction:****

On 25th February 2022, the Department of Statistics organized a Career Counselling Programme focusing on the field of Statistical Consulting. The event aimed to provide students and faculty members with valuable insights into the role of statistical consultants and the potential career opportunities in this field. The lecture was delivered by Dr. Dharampal Singh, an experienced statistician and expert in statistical consulting.

****Programme Overview:****

The Career Counselling Programme aimed to address the increasing demand for statistical consulting services in various industries and research fields. The event welcomed undergraduate and postgraduate students, as well as faculty members interested in learning about statistical consulting as a career path.

****Guest Lecture by Dr. Dharampal Singh:****

Dr. Dharampal Singh, a highly respected statistician with extensive experience in statistical consulting, delivered an engaging and informative lecture on the subject of Statistical Consulting. His expertise and practical knowledge in the field allowed him to provide participants with a comprehensive understanding of the role of statistical consultants. The lecture encompassed the following key elements:

****1. Introduction to Statistical Consulting:****

Dr. Singh began by providing an introduction to statistical consulting, highlighting its importance in assisting clients with statistical analysis and decision-making. He explained how statistical consultants work with clients from various disciplines to design studies, collect and analyze data, and interpret results.

****2. Skills and Qualifications of a Statistical Consultant:****

The guest lecture focused on the essential skills and qualifications required to succeed as a statistical consultant. Dr. Singh discussed the importance of strong statistical knowledge, effective communication skills, problem-solving abilities, and proficiency in statistical

software. He emphasized the need for continuous learning and staying updated with advancements in statistical methods and tools.

****3. Consulting Process and Methodology:****

Dr. Singh delved into the consulting process and methodology followed by statistical consultants. He discussed the steps involved in a consulting project, including understanding the client's objectives, formulating research questions, designing studies, data collection and cleaning, statistical analysis, interpretation of results, and effective communication of findings.

****4. Ethical Considerations in Statistical Consulting:****

The guest lecture highlighted the ethical considerations that arise in the field of statistical consulting. Dr. Singh discussed issues such as maintaining client confidentiality, ensuring data integrity and security, avoiding conflicts of interest, and adhering to professional and ethical guidelines. Participants gained insights into the ethical responsibilities of statistical consultants and the importance of maintaining integrity in their work.

****5. Career Opportunities in Statistical Consulting:****

Dr. Singh concluded the lecture with a discussion on the career opportunities available in the field of statistical consulting. He highlighted potential roles such as statistical consultant, data analyst, research associate, and academic consultant. He discussed the demand for skilled statistical consultants in industries such as healthcare, finance, market research, government agencies, and academia.

****Conclusion:****

The Career Counselling Programme organized by the Department of Statistics on 25th February 2022 was a resounding success. Attendees gained a deeper understanding of the skills and qualifications required to excel in this field, as well as the ethical considerations involved in statistical consulting. The department expresses its gratitude to Dr. Dharampal Singh for sharing his expertise and inspiring the participants to consider careers in statistical consulting, contributing to the advancement of statistical practice in various domains.

****Department of Statistics Career Counselling Programme Report****

****Date: 15/3/2022****

****Introduction:****

On 15th March 2022, the Department of Statistics organized a Career Counselling Programme focusing on the field of Statistical Quality Control. The event aimed to provide students and faculty members with valuable insights into the applications of statistics in quality control and the potential career opportunities in this field. The lecture was delivered by Dr. Narendra Singh Thakur, a distinguished expert in statistical quality control.

****Programme Overview:****

The Career Counselling Programme aimed to address the growing importance of statistical quality control in various industries, including manufacturing, healthcare, and service sectors. The event welcomed undergraduate and postgraduate students, as well as faculty members interested in exploring the field of statistical quality control.

****Guest Lecture by Dr. Narendra Singh Thakur:****

Dr. Narendra Singh Thakur, an esteemed statistician with extensive experience in statistical quality control, delivered an enlightening and informative lecture on the subject. His expertise in the field allowed him to provide participants with a comprehensive understanding of statistical quality control and its applications. The lecture covered the following key elements:

****1. Introduction to Statistical Quality Control:****

Dr. Thakur began by providing an introduction to statistical quality control, highlighting its role in ensuring product and process quality in various industries. He explained how statistical methods are used to monitor and control the quality of products and processes, thereby minimizing defects and improving overall performance.

****2. Statistical Tools and Techniques in Quality Control:****

The guest lecture focused on showcasing the statistical tools and techniques used in quality control. Dr. Thakur discussed methods such as control charts, process capability analysis, acceptance sampling, and design of experiments. He explained how these techniques are applied to monitor processes, identify sources of variation, and make data-driven decisions to improve quality.

****3. Quality Control in Manufacturing and Service Sectors:****

Dr. Thakur delved into the applications of statistical quality control in both manufacturing and service sectors. He discussed how quality control is used to ensure consistent product quality in manufacturing processes and to improve service delivery in areas such as healthcare, customer support, and transportation. Participants gained insights into the specific challenges and approaches to quality control in different industries.

****4. Statistical Process Control and Six Sigma:****

The guest lecture highlighted the concepts of statistical process control (SPC) and Six Sigma, which are widely used in quality control. Dr. Thakur explained how SPC involves monitoring and controlling processes using statistical techniques, while Six Sigma focuses on reducing process variation and achieving near-perfect quality levels. Participants gained an understanding of the principles and methodologies behind these approaches.

****5. Career Opportunities in Statistical Quality Control:****

Dr. Thakur concluded the lecture with a discussion on the career opportunities available in the field of statistical quality control. He highlighted potential roles such as quality control analyst, quality assurance manager, process improvement specialist, and consultant. He discussed the demand for professionals with expertise in statistical quality control and the skills and knowledge required to excel in this field.

****Conclusion:****

The Career Counselling Programme organized by the Department of Statistics on 15th March 2022 was a resounding success. Dr. Narendra Singh Thakur's expertly delivered guest lecture on Statistical Quality Control provided participants with valuable insights into the field and its applications in various industries. Attendees gained a deeper understanding of the statistical tools and techniques used in quality control, as well as the career opportunities available in this field. The department expresses its gratitude to Dr. Narendra Singh Thakur for sharing his expertise and inspiring the participants to consider careers in statistical quality control, contributing to the advancement of quality management practices across industries.

1	Name of the Department / Unit / Agency:	Department of Statistics
2	Name of the Activity:	One Day Lecture on “Information about Job oriented training in Computer Sciences”
3	Name of the Scheme:	-
4	Date and Year of the Activity:	18/02/2020
5	Number of Students Participated in the activity:	26
6	Report of the Activity (in 100 words):	<p>In one day lecture series for UG and PG students, a lecture was organized on 18.02.2020 on the topic of “Information about job oriented training in computer science” by Department of Statistics. The Chief guests for the program were Mr. Gaurav Manjrekar & Mr. Swapnil Girase. Their welcoming was done by Prof. Mangla Chauragade and Prof. Rashmi Awad by giving them a bouquet. Starting to Prof. Kunika Tiwari who gave the general introduction of our chief guests. Firstly the program was lead by Mr. Gaurav Manjrekar Sir. He gave information about the courses of computer science in which there is vast use of statistics like mobile app development, web designing, digital marketing, graphics designing etc., the demand of which is bombarding in the current world. He told the students that they have vast opportunity to build their career by doing these courses. After doing these courses, students get placed on higher packages. He gave brief explanation on job related courses to the students. Afterwards the program was continued by Mr. Swapnil Girase Sir, he gave information about SAP i.e. , how to manage the data science with the use of python, R – language, SAS,SPSS and how to make career in designing software. At the end of lecture, a vote of thanks was given by Prof. Divya Trivedi of the department that the lecture consists of the precious information about the job oriented computer</p>

		courses that definitely helps our student in their future planning.

****Department of Statistics Career Counselling Programme Report****

****Dates: 21/06/2020 and 22/06/2020****

****Introduction:****

On 21st and 22nd June 2020, the Department of Statistics organized a comprehensive Career Counselling Programme focusing on the intriguing subject of Statistical Genetics and Genomics. The event aimed to provide students and faculty members with valuable insights into the intersection of statistics, genetics, and genomics and the exciting career opportunities within the field. The lectures were delivered by Dr. Singdha Banerjee and Dr. Rajesh Tailor, esteemed experts in the field of statistical genetics and genomics.

****Programme Overview:****

The Career Counselling Programme aimed to address the growing interest among students in pursuing careers in statistical genetics and genomics. The two-day event provided participants with a deep understanding of the field and its applications in various domains, including healthcare, biotechnology, and research. The programme included lectures, discussions, and interactive sessions.

****Day 1: Lecture by Dr. Singdha Banerjee****

Dr. Singdha Banerjee, an accomplished geneticist and statistician, delivered an enlightening lecture on the subject of Statistical Genetics. The lecture covered the following key elements:

1. Introduction to Statistical Genetics: Dr. Banerjee provided an overview of the field, highlighting the integration of statistics and genetics in studying inherited traits, genetic disorders, and population genetics. Participants gained insights into the fundamental concepts and methodologies used in statistical genetics.

2. Genetic Association Studies: The lecture focused on the significance of genetic association studies in identifying genetic variants associated with complex diseases and traits. Dr. Banerjee discussed various study designs, statistical models, and computational tools employed in genetic association studies.

3. Genomic Data Analysis: Participants were introduced to the analysis of large-scale genomic data, including techniques for genotyping, next-generation sequencing, and gene expression analysis. Dr. Banerjee discussed statistical approaches for analyzing and interpreting genomic data, emphasizing the importance of quality control and statistical inference.

****Day 2: Lecture by Dr. Rajesh Tailor****

Dr. Rajesh Tailor, a renowned expert in genomics and statistical analysis, delivered an engaging lecture on the subject of Statistical Genomics. The lecture covered the following key elements:

1. Introduction to Statistical Genomics: Dr. Tailor provided an overview of the field, focusing on the integration of statistical methods with genomics to understand gene function, gene regulation, and genome-wide association studies. Participants gained insights into the statistical challenges and approaches in genomics research.

2. Gene Expression Analysis: The lecture explored the statistical analysis of gene expression data, including techniques such as microarrays and RNA sequencing. Dr. Tailor discussed differential expression analysis, gene set enrichment analysis, and the integration of gene expression data with other omics data.

3. Computational Methods in Genomics: Participants were introduced to computational methods and tools used in genomics research, such as genome assembly, sequence alignment, and variant calling. Dr. Tailor discussed the statistical foundations of these methods and their applications in understanding genomic variations and evolutionary dynamics.

****Conclusion:****

The Career Counselling Programme organized by the Department of Statistics on 21st and 22nd June 2020 was a tremendous success. The lectures delivered by Dr. Singdha Banerjee and Dr. Rajesh Tailor on Statistical Genetics and Genomics provided students and faculty members with invaluable insights into this interdisciplinary field. Participants gained a deeper understanding of the role of statistics in genetics and genomics research, including genetic association studies, genomic data analysis, gene expression analysis, and computational methods in genomics. The department expresses its sincere gratitude to Dr. Singdha Banerjee and Dr. Rajesh Tailor for their expertise.

****Department of Statistics Career Counselling Programme Report****

****Date: 27/02/2020****

****Introduction:****

On 27th February 2020, the Department of Statistics organized a Career Counselling Programme focusing on the exciting field of Sports Analytics. The event aimed to provide students and faculty members with insights into the application of statistics in sports and the promising career opportunities in the realm of sports analytics. The lecture was delivered by Dr. Pravven Gupta, a distinguished expert in the field of sports analytics.

****Programme Overview:****

The Career Counselling Programme aimed to address the growing interest among students in pursuing careers in sports analytics, combining their passion for sports with statistical expertise. The event was open to undergraduate and postgraduate students, as well as faculty members keen on exploring the emerging field of sports analytics.

****Guest Lecture by Dr. Pravven Gupta:****

Dr. Pravven Gupta, a renowned sports analyst and statistician, delivered an insightful and captivating lecture on the subject of Sports Analytics. His expertise and experience in the field allowed him to provide participants with a comprehensive understanding of the role of statistics in sports analysis and the career prospects in sports analytics. The lecture encompassed the following key elements:

****1. Introduction to Sports Analytics:****

Dr. Gupta began by providing an introduction to sports analytics, highlighting its significance in gaining a competitive edge in the world of sports. He explained how statistical analysis and data-driven decision-making have revolutionized the sports industry, enabling teams, coaches, and organizations to make informed decisions.

****2. Applications of Statistics in Sports:****

The guest lecture focused on showcasing the various applications of statistics in the world of sports. Dr. Gupta discussed how statistical analysis is used in player performance evaluation, game strategy development, injury prevention, and talent scouting. He shared examples from

different sports, such as basketball, soccer, and baseball, to demonstrate the impact of statistics in optimizing team performance.

****3. Data Collection and Analysis:****

Dr. Gupta delved into the process of data collection and analysis in sports analytics. He explained the importance of collecting accurate and relevant data, including player statistics, game logs, and tracking data. He also discussed various statistical techniques and models used in sports analytics, such as regression analysis, machine learning algorithms, and predictive modeling.

****4. Career Opportunities in Sports Analytics:****

The guest lecture highlighted the numerous career opportunities in the field of sports analytics. Dr. Gupta discussed potential roles such as sports data analyst, performance analyst, scouting analyst, and sports research scientist. He provided insights into the industry demand for sports analytics professionals and the skills and qualifications required to excel in this field.

****5. Q&A Session:****

The event concluded with an interactive question and answer session, allowing participants to engage with Dr. Pravven Gupta. Attendees had the opportunity to seek further clarification on specific topics, career prospects, and advice for pursuing a career in sports analytics.

****Conclusion:****

The Career Counselling Programme organized by the Department of Statistics on 27th February 2020 was a remarkable success. Dr. Pravven Gupta's guest lecture on Sports Analytics provided students and faculty members with valuable insights into the field and its applications in the world of sports. Participants gained a deeper understanding of the role of statistics in optimizing sports performance and discovered the exciting career opportunities available in sports analytics. The department expresses its gratitude to Dr. Pravven Gupta for his enlightening lecture, inspiring the attendees to pursue rewarding careers in sports analytics and contributing to the growth of the field.

****Department of Statistics Career Counselling Programme Report****

****Date: 11/11/2017****

****Introduction:****

The Department of Statistics organized a Career Counselling Programme on 11th November 2017, aimed at providing valuable insights into career opportunities in the field of statistics. The event featured a guest lecture by Mr. Mahesh Dubey, an esteemed professional in the field, who shared his expertise and knowledge with the participants.

****Programme Overview:****

The Career Counselling Programme was designed to address the growing interest among students in pursuing careers in statistics and related fields. The event was open to undergraduate and postgraduate students, as well as faculty members interested in exploring various career paths within statistics.

****Guest Lecture by Mahesh Dubey:****

Mr. Mahesh Dubey, a renowned statistician with extensive industry experience, delivered an engaging and informative lecture on the subject of career counselling in statistics. He shared his personal experiences, insights, and practical advice for aspiring statisticians. The lecture covered the following key topics:

1. Introduction to Statistics Careers: Mr. Dubey provided an overview of the diverse career opportunities available in the field of statistics. He discussed the roles and responsibilities of statisticians in different industries, emphasizing the increasing demand for statistical expertise in today's data-driven world.

2. Industry Applications: The guest speaker highlighted the practical applications of statistics across various industries such as healthcare, finance, market research, and government sectors. He explained how statisticians contribute to decision-making processes, problem-solving, and data analysis in these domains.

3. Skills and Qualifications: Mr. Dubey outlined the essential skills and qualifications required for a successful career in statistics. He emphasized the importance of strong analytical abilities, proficiency in statistical software, and effective communication skills. Furthermore, he discussed the significance of continuous learning and professional development to stay relevant in the field.

4. Career Paths: The guest lecture explored different career paths available to statisticians, including academia, research, industry, and government sectors. Mr. Dubey shared valuable insights on the pros and cons of each path, helping participants gain a deeper understanding of the options available to them.

5. Q&A Session: The event concluded with an interactive question and answer session, allowing participants to seek further clarification on specific topics or career-related queries. Mr. Dubey enthusiastically answered the questions, providing valuable guidance to the attendees.

****Conclusion:****

The Career Counselling Programme organized by the Department of Statistics on 11th November 2017 was a resounding success. The guest lecture by Mr. Mahesh Dubey shed light on the vast array of career opportunities in the field of statistics. Participants gained valuable insights into the skills, qualifications, and practical applications of statistics in various industries. The event provided a platform for students and faculty members to interact with an experienced professional, enabling them to make informed decisions regarding their career paths. We express our sincere gratitude to Mr. Mahesh Dubey for his enlightening lecture and look forward to organizing more such programmes in the future to assist students in their career aspirations.

****Department of Statistics Career Counselling Programme Report****

****Date: 01/05/2018****

****Introduction:****

On 11th November 2017, the Department of Statistics organized a Career Counselling Programme to provide students and faculty members with valuable insights into career opportunities within the field of statistics. The highlight of the event was a guest lecture delivered by Prof. K.B. Rajole, an esteemed academic and expert in the field of statistics.

****Programme Overview:****

The Career Counselling Programme aimed to address the growing interest among students in pursuing careers related to statistics. The event was open to undergraduate and postgraduate students, as well as faculty members seeking guidance on various career paths within the statistical domain.

****Guest Lecture by Prof. K.B. Rajole:****

Prof. K.B. Rajole, a highly respected academic and statistician, delivered an enlightening and informative guest lecture on the subject of career counselling in statistics. With his extensive knowledge and expertise, he shared valuable insights and advice with the attendees. The lecture covered the following key aspects:

****1. Introduction to Statistics Careers:****

Prof. Rajole provided a comprehensive introduction to the numerous career opportunities available in the field of statistics. He discussed the role of statisticians in addressing real-world challenges and emphasized the importance of statistical analysis and interpretation in decision-making processes.

****2. Academic and Research Paths:****

The guest lecture highlighted the academic and research avenues within statistics. Prof. Rajole shed light on pursuing higher education in statistics and related fields, including the significance of postgraduate degrees and research opportunities. He also discussed the benefits and challenges of an academic career and provided guidance on building a successful research profile.

****3. Industry Applications:****

Prof. Rajole explored the practical applications of statistics across a wide range of industries, such as finance, healthcare, marketing, and government sectors. He elaborated on the role of statisticians in data analysis, predictive modeling, risk assessment, and decision support systems, showcasing the relevance and impact of statistics in diverse sectors.

****4. Skill Development and Qualifications:****

The guest lecture emphasized the essential skills and qualifications required for a thriving career in statistics. Prof. Rajole highlighted the significance of statistical software proficiency, programming skills, and domain-specific knowledge. He also stressed the importance of effective communication, critical thinking, and problem-solving abilities in the field of statistics.

****5. Career Growth and Professional Development:****

Prof. Rajole discussed the various pathways for career growth and professional development within statistics. He provided insights into industry certifications, professional associations, networking opportunities, and continuous learning through workshops, conferences, and online resources. The lecture aimed to equip the participants with knowledge about enhancing their skills and advancing their careers.

****Conclusion:****

The Career Counselling Programme organized by the Department of Statistics on 11th November 2017 was a tremendous success. Prof. K.B. Rajole's guest lecture provided valuable guidance and insights into the vast array of career opportunities within the field of statistics. Participants gained a deeper understanding of the academic, research, and industry pathways available to them. The event enabled students and faculty members to interact with an eminent academic and statistician, fostering their career aspirations and guiding them towards making informed decisions. The department expresses its sincere appreciation to Prof. K.B. Rajole for his insightful lecture and looks forward to organizing similar programmes in the future to assist individuals in their pursuit of successful careers in statistics.
